

MAXIMIZE SECURITY IN THE ENTERPRISE

Get cutting-edge, hardware-enhanced data protection with 6th & 7th generation Intel® Core™ vPro™ processor-based devices running Windows® 10.

SECURE STARTUPS

Better Together Security

Secure Boot ensures devices are protected from the start, checking both the hardware and operating system for malware before boot. Meanwhile, Intel® Virtualization Technology works with Windows Device Guard* to prevent installation of unauthorized software.

KEEP DATA SAFE

Solid Remote Management

Paired with the Intel® SSD Pro Family, these processors support new Intel® Remote Secure Erase capabilities, enabling IT to erase drives remotely, mitigating data breaches when employees move on or when devices are stolen or change ownership.

UP TO 3 HARDENED FACTORS

Customizable Multifactor Authentication

A hardware-enhanced identity protection solution, Intel® Authenticate Technology enables IT to tailor access by combining a variety of factors to validate users: Something you know, like a password; something you have, like a smartphone; and something you are, like biometrics.

Deliver the latest security features with 6th & 7th generation Intel® Core™ vPro™ processors and Windows® 10.
