

SMARTER CONFERENCE ROOMS, SMARTER MEETINGS

Intel® Unite™ is powering modern, connected, and secure meeting spaces that transform collaboration and productivity by design.

More Security, Fewer Numbers

Joining a meeting is as easy as a single click—no PIN required. Intel® Unite™ helps keep content sharing private to transform sales meetings and strategy sessions. For added protection, the new Meeting Lock feature lets you close meetings to new attendees.

Shorter Setup, More Productivity

Select Intel® Core™ vPro™ processor-based hub devices can unlock the Intel® Unite™ solution for multiple users in seconds—in fact, Intel implemented this solution to reduce its own average meeting setup time.¹

Innovate with New Features

Organizations can start small with a single standalone deployment to explore which capabilities are right for them, like HD video and audio sharing for in-room participants, before rolling out the Intel® Unite™ tool on a large scale.

Enable smarter meetings at intel.com/unite

Intel® technologies may require enabled hardware, specific software, or services activation. Performance varies depending on system configuration. No computer system can be absolutely secure. Check with your system manufacturer or retailer or learn more at intel.com.
